SUMMARY

Full-stack .NET developer with hands-on production experience building ticketing, warehouse management, and reporting systems on ASP.NET Core, EF Core, and SQL Server, paired with Angular/PrimeNG on the front end. Comfortable stepping into an existing codebase, tracing issues through the data layer, and owning a feature from investigation through deployment. Currently expanding into GraphQL and Clean Architecture while targeting remote roles with international teams.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

2025 – Present

TimeFree Innovations Inc. — Trans-Phil House, Bagtikan St, corner Chino Roces Ave, Makati

- **Ticketing System** — Built backend services on ASP.NET Core, EF Core, and MS SQL Server for a production ticket management system used to track and resolve requests such as pull-outs. Implemented server-side paging, searching, filtering, and sorting to keep the system responsive under high data volume.
- **Reporting Dashboard** — Wrote SQL Server stored procedures to aggregate high-volume ticket data, giving the ticketing system's reporting dashboard accurate, performant output that management relies on directly.
- **Warehouse Management System** — Developed backend logic for tracking inbound, outbound, and transfer movements at the bin/SKU level, keeping inventory records consistent across the warehouse. Built reporting views and list screens with server-side paging, searching, filtering, and sorting for high-volume stock movement data.
- Contributed on the front end with Angular and PrimeNG, building responsive UI components and wiring them into backend APIs across both the ticketing and warehouse systems.

L2 Junior Software Developer

Sep 2024 – Dec 2024

Simplified Business Consultancy — 407 Jocfer Bldg, Commonwealth, Quezon City

- Built scalable solutions with C#, Blazor, and .NET under an MVC architecture, including PWAs and responsive UIs with MudBlazor.
- Delivered core business workflows across three production systems: a subscription-based billing and account lifecycle platform, a franchising solution for onboarding and location management, and an e-commerce platform for catalog and order processing.
- Partnered directly with clients on presentations and project planning, keeping delivery aligned with business objectives and timelines.

Junior Developer

Nov 2023 – Sep 2024

Simplified Business Consultancy — 407 Jocfer Bldg, Commonwealth, Quezon City

- Designed and developed full-stack solutions using C#, Blazor, and the .NET Framework.
- Delivered a production PWA built on Blazor and .NET Core, deployed on Microsoft Azure.

SKILLS

Core Stack	C#, .NET Core, ASP.NET Core, ASP.NET MVC, Entity Framework Core, Angular, TypeScript, PrimeNG, REST APIs, GraphQL
Languages	C, C#, JavaScript, TypeScript
Databases	MS SQL Server, MySQL, PostgreSQL, SQLite
Testing	xUnit, Moq, EF Core InMemory/SQLite, Integration Testing (WebApplicationFactory)
DevOps & Cloud	Azure, Azure DevOps, GitHub Actions (CI/CD), Git
Dev Tools	Figma, Postman
AI-Assisted Development	Claude / Claude Code, ChatGPT / Codex
Communication	Strong written and verbal English communication

EDUCATION

Bachelor of Science in Information Technology

Bulacan State University (Sarmiento Campus)
Kaypian Rd, San Jose del Monte City, Bulacan
2019 – 2023

CERTIFICATES

Advanced Front-End Web Development

J.P. Morgan Bayan Academy

Intermediate Front-End Web Development

J.P. Morgan Bayan Academy
